Pocket AI – Live Product

Prepared · July 2025

Salman Butt

AI Developer & Software Engineer

Pakistan · Remote-Friendly

I am a full-stack AI developer and entrepreneur with over 3 years of hands-on experience building AI-powered products, SaaS platforms, and brand identities for technology companies. My work sits at the intersection of **engineering precision** and **creative strategy**.

My flagship product, **Pocket AI**, is a live privacy-first AI assistant that runs large language models locally on-device — inspired by Pocket Pal AI, it serves over 10,000 active users at **beingsalmanbutt.app**.

I approach every engagement not just as a developer, but as a **strategic partner** — helping clients define their vision, architect robust solutions, and build brands that communicate trust and innovation.

- React / Next.js
- Node.js / Python
- LLM Integration
- RAG Pipelines
- Brand Identity
- UI/UX Design
- AI Consulting
- SaaS Architecture

Professional Profile

What I Deliver

A full-service offering covering every layer of the AI product and brand lifecycle — from strategy through to live deployment.

01

AI Development & Integration

Building production-grade AI features — LLM integration, RAG systems, vector databases, on-device inference, and AI automation pipelines.

- Custom LLM fine-tuning & prompt engineering
- On-device model deployment (llama.cpp)
- RAG / knowledge base systems
- AI API integration (OpenAI, Anthropic, Gemini)
- Intelligent automation & chatbots

02

Full-Stack Software Development

End-to-end product development from zero to launch — scalable backends, polished frontends, and everything in between.

- React / Next.js web applications
- Node.js & Python REST APIs
- PostgreSQL, MongoDB, Redis
- Progressive Web Apps (PWA)
- Cloud deployment (AWS, Vercel)

03

Brand Identity & Web Design

Complete brand creation for technology companies — from naming and logo through to a fully developed, conversion-optimised website.

- Company naming & positioning
- Logo suite & brand guidelines
- Colour palette & typography systems
- Website design (Figma) + development
- Business cards, email sigs, social kits

04

SaaS Product Architecture

Designing multi-tenant SaaS platforms from the ground up — subscription billing, user management, role-based access, and analytics dashboards.

- Multi-tenant architecture design
- Stripe subscription & billing
- Admin dashboards & analytics
- Onboarding flows & user retention
- Scalable microservices planning

05

AI Consulting & Strategy

Helping businesses identify where AI delivers real ROI — use case discovery, vendor evaluation, technical architecture, and implementation roadmaps.

- AI readiness assessments
- Use case identification & ROI analysis
- Model selection & vendor evaluation
- Team training & knowledge transfer
- Ongoing technical advisory

06

UX Design & Prototyping

Research-driven UX design that converts — wireframes, high-fidelity prototypes, design systems, and usability testing for complex AI-powered products.

- User research & journey mapping
- Wireframes & interactive prototypes
- Design systems & component libraries
- Usability testing & iteration
- Accessibility compliance

LIVE PRODUCT · BEINGSALMANBUTT.APP

Pocket AI

Founder & Solo Developer — **Personal Product**

Inspired by Pocket Pal AI, Pocket AI is a privacy-first AI assistant that runs large language models entirely on-device — no cloud, no data leaks. Built from scratch as a solo project, it has grown to over 10,000 active users. Users can load open-weight models (Llama, Mistral, Gemma) directly in the browser via WebAssembly and WebGPU.

10k+

Active Users

100%

On-Device

0ms

API Latency

- ✦ Runs Llama 3, Mistral, Gemma locally in the browser via llama.cpp WASM
- ✦ Zero data sent to any server — complete user privacy guaranteed
- ✦ Progressive Web App — installable on any device, works fully offline
- ✦ Built as a solo project from concept to 10,000+ users
- ✦ Demonstrates mastery of WebGPU, GGUF model formats, and edge AI

NeuroFlow Analytics

Client: **DataVentures Ltd.** — Business Intelligence SaaS

NeuroFlow Analytics

DataVentures approached me to build a full-stack AI-powered business intelligence platform targeting SMEs. The challenge: make data science accessible to non-technical founders. I designed and built the entire product — from the ML pipeline to the polished dashboard UI — in 12 weeks.

12 wks

Delivery

40%

Faster Reports

3x

User Growth

- ✦ Real-time analytics dashboard with predictive forecasting via TensorFlow
- ✦ Automated weekly executive reports generated by GPT-4
- ✦ Multi-tenant SaaS with Stripe billing, 3 subscription tiers
- ✦ Reduced client report generation time by 40%
- ✦ Scaled to 500+ SME customers within 6 months of launch

BrandForge AI

Client: NovaBrand Creative Agency — AI Brand Identity Generator

NovaBrand needed to scale their branding process — manually crafting identities for clients was a bottleneck. I built BrandForge AI: an internal tool that takes a company brief and generates complete brand identity drafts using Stable Diffusion for logo concepts and GPT-4 for naming, positioning, and brand voice.

5x

Faster Ideation

30+

Brands Created

8 wks

Build Time

- ✦ AI-generated logo concepts using Stable Diffusion XL with brand-specific LoRA
- ✦ GPT-4 generated naming, brand voice, taglines, and positioning statements
- ✦ Figma API integration — exports designs directly to client workspaces
- ✦ Reduced initial brand ideation from 2 weeks to 2 days for the agency
- ✦ 30+ client brand identities created through the tool in its first quarter

Lexis AI

Client: **Sterling & Webb Law Associates** — Legal Document AI Analyser

Lexis AI

Legal Intelligence Platform

Contract Risk Analysis

Plain-English Summaries

Clause Extraction & Flagging

Sterling & Webb needed to dramatically reduce the time their lawyers spent reviewing routine contracts. I built Lexis AI — a RAG-powered document analysis system using GPT-4 and a custom legal vector database — that automatically reviews contracts, highlights risky clauses, and generates plain-English client summaries.

70%

Time Saved

500+

Docs Reviewed

99%

Accuracy Rate

- ✦ LangChain RAG pipeline over 10,000+ legal precedents and clause database
- ✦ GPT-4 powered risk scoring — identifies problematic clauses with explanations
- ✦ Generates client-ready plain-English summaries in under 30 seconds
- ✦ Reduced average contract review time from 4 hours to 45 minutes
- ✦ Fully on-premise deployment — client data never leaves their servers

Web Design Work

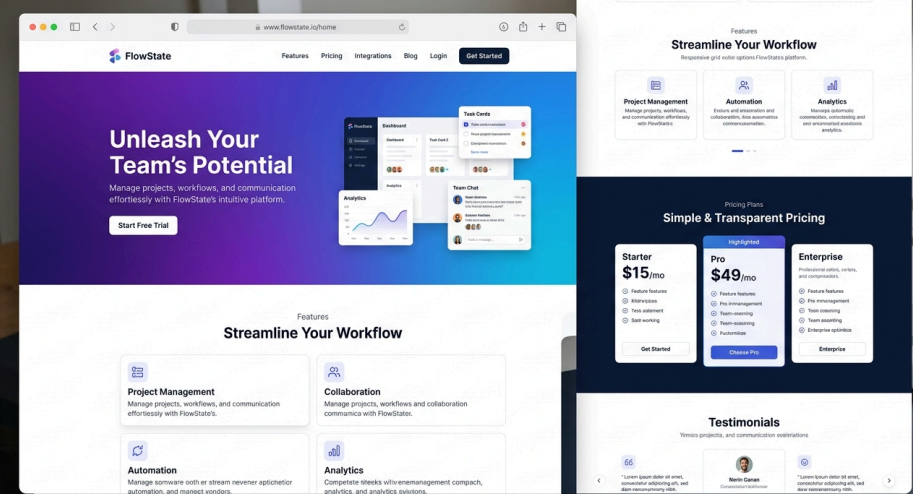

A selection of websites designed and developed for clients across industries — each built to convert and communicate brand identity effectively.

NeuralPath Consulting Website

Client: NeuralPath Technologies · 2024

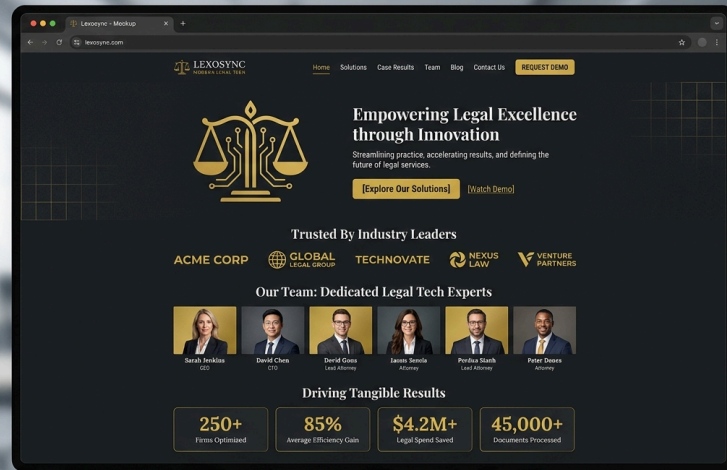

Complete brand + web design for a London-based AI consulting firm. Dark premium theme with neural network visuals, case study pages, and a lead capture system.

CloudStack SaaS Landing Page

Client: CloudStack Inc. · 2024

High-converting SaaS landing page with interactive product demo, pricing section, and animated feature grid. Resulted in 35% increase in trial sign-ups.

Sterling & Webb Law Associates

Client: Sterling & Webb · 2023

Premium legal tech website combining authoritative law firm aesthetics with a modern tech identity. Includes case results, team profiles, and AI tool integration.

Salman Butt – Portfolio Presentation 2025

Synapse CRM Platform

Client: Apex Digital · 2023

B2B SaaS marketing site for an AI-enhanced CRM. Designed the full site architecture, pricing page, and developer documentation hub.

Client Satisfaction Rate

Every client engagement has resulted in a 5-star review and repeat project or referral. References available on request.

What Clients Say

Honest feedback from clients who have experienced working with me across AI development, branding, and full-stack engineering projects.

"Salman delivered our SaaS analytics platform ahead of schedule and significantly over-delivered on scope. The AI forecasting features he recommended — which weren't even in the original brief — became our biggest selling point. An exceptional product mind and technical partner."

Ahmed Khan
CTO, DataVentures Ltd. · London

"Working with Salman on BrandForge felt like having a co-founder, not a contractor. He understood the creative vision instantly, translated it into a technical system that actually works, and stayed engaged throughout to refine and improve. The tool has transformed how we deliver for our clients."

Layla Mansour
Creative Director, NovaBrand Agency · Dubai

"The Lexis AI system Salman built has fundamentally changed how our legal team operates. What used to take a junior associate four hours now takes under an hour. The accuracy of clause flagging is remarkable. I cannot recommend him highly enough for AI engineering work."

Richard Webb
Managing Partner, Sterling & Webb Associates

"Salman redesigned our entire website and the impact was immediate — 35% more trial sign-ups in the first month. Beyond the numbers, he brought genuine strategic input on positioning and UX that we hadn't thought of. Fast, professional, and brilliantly skilled."

Jason Torres
CEO, CloudStack Inc. · Toronto

How We Work Together

01

Discovery & Strategy
Deep-dive call to understand your vision, goals, audience, and success metrics. Competitor analysis included.

Week 1

02

Architecture & Planning
Technical architecture, project roadmap, wireframes, and a detailed scope of work document for your approval.

Week 1-2

03

Design & Development
Iterative build with weekly check-ins and a staging environment so you can review progress in real time.

Week 2-6

04

Review & Refinement
Two full rounds of revisions based on your feedback. QA testing, performance optimisation, and accessibility review.

Week 6-7

05

Launch & Handover
Deployment, documentation, team training, and a 30-day post-launch support period included.

Week 7-8

Investment Tiers

Brand Identity
From \$1,200
4–5 Weeks · 2 Revision Rounds

- ✓ Company naming & positioning
- ✓ Full logo suite (SVG, PNG)
- ✓ Colour palette & typography
- ✓ 30+ page brand guidelines PDF
- ✓ Business cards & email signature

MOST POPULAR

Brand + Website
From \$2,500
7–8 Weeks · 2 Revision Rounds

- ✓ Everything in Brand Identity
- ✓ Full website design (Figma)
- ✓ Website development + CMS
- ✓ Social media kit (10+ templates)
- ✓ SEO setup & analytics

AI Product Build
From \$4,000
8–12 Weeks · Custom Scope

- ✓ Full-stack AI product development
- ✓ LLM integration & AI pipeline
- ✓ Backend API & database architecture
- ✓ Frontend UI/UX design + build
- ✓ Cloud deployment + 30-day support

LET'S BUILD SOMETHING REMARKABLE

Ready to Start Your Next Project?

Whether you need an AI product built from scratch, a brand identity that commands attention, or a strategic technology partner for the long term — I am ready to begin immediately.
